

Santa Ana Women's Golf Association

2026 Tournament Formats

Below is a brief description of each format that will be used for 2026. A Rules Sheet will be available for each event that provides more details. *All information is subject to change.*

ABCD Putt to Any Hole

Count each stroke and record your gross score on the scorecard. Each green will have three options to putt to. You pick the one you like! 4-person pairings will be assigned.

Individual Stroke Play

Count each stroke and record your gross score on the scorecard. No gimmicks!

2-Person Best Ball

Each player on the team plays her own ball throughout the round. The 'best ball' for each hole serves as the team score. Full handicaps will be used.

2-Person, 4-Person Las Vegas Scramble (also called ABCD LV Scramble)

Each player will hit a tee shot. The team will select the best tee shot and all players will hit their second shot from there and continue to play their own ball until holed out.

Eclectic

The object of the game is for the 2-person team to better their hole-by-hole score on the 2nd day.

Member / Guest - Best Ball and Putting Competition

Invite a non-member to play in a 2-person best ball tournament. Each team member plays their own ball throughout the round. The 'best ball' for each hole serves as the team score. There will be a putting competition after the round.

Hate 'Em Holes

Count each stroke and record gross and net on scorecard. The three selected "Hate 'Em Holes" (chosen by Tournament Committee) will automatically be given a gross and a net score of par.

Sixes

This is a two-person team event. Holes 1 – 6 will be a modified alternate shot format. Holes 7-12 will be a scramble format. Holes 12-18 will be best ball.

Roll the Dice

Each team member will be assigned a number. The first player listed is #1, the second player listed is #2 and the third player listed is #3. Every team member will play each hole to its completion. After the completion of each hole you will roll the die and use the net score of the applicable team member (per the rolled die) as the team's score. If you roll a #4 you will use the lowest net score of the team.

Landing of the Turkeys

The object of this tournament is for each individual player to beat their own target score. Everyone's individual target score is determined as follows: $72 \text{ plus } 85\% \text{ of course handicap} = \text{target score}$. When your target score shot has come to rest, you plant your turkey at that spot.
